

Holding Cabinet

XCH030

Features:

- ◆ Function **COOK** to cook food with low temperatures;
- ◆ Function **HOLD** to maintain food at the end of the cooking cycle;
- ◆ Completely built in Stainless Steel;
- ◆ Stout stainless steel door;
- ◆ Handles for transportation;
- ◆ Equipped with cable + 230V plug;
- ◆ Digital control panel;
- ◆ Core temperature control probe for even cooking.

Imagine to be able to cook and hold different types of food at the ideal temperature in any location you are at, simply needing a 230V socket.

Cooking results are great thanks to:

- ◆ **Low temperatures** (function **COOK**– max. 120°C) that grant low and gradual cooking, that will exalt the tenderness of your loaves of meat and will reduce their weight loss;
- ◆ Function **HOLD**, that **maintains** the food in the cavity at the ideal temperature;
- ◆ **Core temperature control probe** that allows you to monitor and regulate the core temperature.

Technical Information	XCH030
Capacity:	3 GN 1/1
Distance between trays:	75mm
Voltage:	230V
Power:	0.76kW
Max. temperature:	120°C
Dimensions (WxDxH mm):	436x630x409
